Yuvraj Dahal

Web developer with a strong commitment to developing and designing interactive, user-friendly websites. I possess expertise in web development and have the ability to adapt quickly to new environments. I enjoy learning and experimenting with new technologies.

EXPERIENCE

Infoclick Digital Solutions

2023 / 2024

- Had the professional experience of working and collaborating with the team at IDS in the past.
- Positioned as a full stack developer at IDS, responsibilities encompassed contributing to diverse web development projects.
- At IDS, I showcased leadership skills by guiding junior team members through various aspects of web development projects.
- Contributed to various projects at IDS, including international websites, UI design, and inventory management systems.

EDUCATION

- Technical Education in **Pokhariya Secondary School**
- Bachelor's in Computer Applications in **Mahendra Morang Adarsha Multiple Campus**

PROJECTS

1. Chatapp

- Bolumna is a web app built with the MERN stack.
- It follows the MVC architecture for backend.
- Used Socket.io for real-time communication.

2. Ne-Care

- Ne-Care is a health care website made using React.js.
- It consists of a landing page and provides services for disabled people.

3. Inventory Management System

- A user-friendly interface built with MERN Stack, providing a responsive and intuitive experience.
- Monitor stock levels, track product quantities, and manage inventory across multiple locations.
- Node.js backend providing RESTful APIs to interact with the inventory data.
- Target users being businesses and companies needing an organized and efficient inventory management system. More projects can be found in GitHub.

ACHIEVEMENTS

Hackathon

- Participated in the three-day hackathon called "Vertex Hacks" held on Kathmandu. Made an application named Agrostack.
- AgroStack, an agriculture app that speeds up deliveries, supports charity, and I contributed to its Node.js backend.
- Worked collaboratively with a team during the hackathon to create the project.
- Uploaded the project on GitHub to showcase the code and collaborate with other developers.
